

# Leadership Styles Questionnaire

Ava Rodriguez

**Start date:** 2022-01-05 08:04:14 **Finish date:** 2022-01-05 08:05:08

## Result:

The autocratic or authoritarian leader is usually characterized by individual control over all decisions with little participation of team members. Since autocratic leadership involves absolute control over the team, these leaders commonly base their decisions only on their ideas and judgments and rarely accept advice from the other members of the team.

Although the autocratic leadership style may sound negative, some instances require strong authoritarian leaders to accomplish a high variety of things quickly and efficiently. A very common instance where this style can be highly positive is a stressful situation where it is important to make decisions quickly without consulting every single member of a large team. However, this leadership style is not recommended to be implemented in creative and innovative workplaces.
